

Balkancar RUEN AD

Balkancar RUEN AD is a leading manufacturer offering wide range of industrial wheels. Our products are associated with reliability, advanced design and outstanding quality. Our product range has evolved through in-depth analysis and understanding of the customer's needs coupled with the design and production of innovative solutions to produce the perfect industrial wheel for the job.

Our company is a leading supplier of high quality wheel assemblies for industrial applications, such as material handling equipment, industrial trailers, ground support equipment, construction equipment – the range of applications which we serve is extensive. All our products are designed to address the critical issues of longer vehicle operating time, improved safety and increased driver comfort.

Benefits and features

- Tailor-made solutions of your critical issues, based on customer application requirements or is manufactured to specific OEM requirements
- A short delivery time due to a large stock of basic materials which enables us to produce quickly most of the industrial wheels
- With no limit order
- Diversity in products' area of types and sizes
- Quality standards for maximum load and life
- Absolute precision and rim calibration

Product Range:

Wheels with 3 – piece and 4-piece 5° tapered bead seat rim

Recommended tyre – solid or pneumatic

- Available range from 8" to 20" in diameter
- Used for wheel loaders, low-loaders trailers and agricultural equipment.
- Also not standard wheels can be made.
- Ease of tyre mounting and demounting.
- Just-in-time manufacturing capability.

Press-On Wheels

- Flexibility of production over castings.
- Reduces manufacturing lead times and costly patterns.
- Higher strength-to-weight ratio than castings.
- Just-in-time manufacturing capability.
- Balkancar RUEN AD is enabled to offer rims and tyres that are perfectly adapted to each other.
- Also not standard wheels can be made.

Quality

As a leader in manufacture and supply of components and parts for forklifts and other material-handling and lifting equipment, Balkancar RUEN AD is committed to achieving the highest quality standards. These standards are documented in the Balkancar RUEN Quality Management System.

The scope of the Balkancar RUEN AD Quality Management System covers all process and provides instructions for the entire company organisation. The Balkancar RUEN Quality Management System aims not only to ensure the ongoing quality of our products and processes, but also to guarantee continuous improvement.

Balkancar RUEN AD has also implemented a Quality Policy which sets quality in all aspects as a primary goal. The Quality Policy is used to set and deploy goals and objectives at every level of the organization.
